(ISC)² Bangkok Chapter Cybersecurity Workforce Survey 2022

Since it was chartering in 2020, (ISC)² Bangkok Chapter has been a platform to connect cybersecurity professionals in Thailand and beyond - it increases chapter members to hundreds in short periods.

To support the community's requirements in an impactful manner, the Chapter developed "(ISC)² Bangkok Chapter Cybersecurity Workforce Survey 2022." to identify cybersecurity workforce demand in Thailand and prioritize the most important things for the community. This survey will be completed anonymously, and the results will be used to design and develop future activities of (ISC)² Bangkok Chapter that meet members' demands.

The survey contains 14 questions

SECTION 1: Survey Profiling (6)
SECTION 2: Quality Measurement (6)
SECTION 3 : Expectation toward (ISC)² Bangkok Chapter (2)

Your anonymity is preserved in completing the survey
